

YOU'RE INVITED

Accurate Clinical Documentation: *The Wellvana Webinars*

Join Wellvana's subject matter experts for an interactive webinar series detailing actionable strategies for Accurate Clinical Documentation. By attending these immersive sessions, you'll deepen your knowledge on risk adjustment, learn the importance of documenting patient conditions with specificity, and understand the different types of Medicare Wellness Visits.

The Sessions

Risk Adjustment 101

Understand the basics of risk adjustment and Hierarchical Condition Categories (HCCs). Outline best practices for documentation and discuss how risk adjustment impacts our ACO success.

Condition-Specific Documentation

Identify the documentation needed to substantiate common chronic conditions, such as diabetes, chronic kidney disease, and major depressive disorder. Apply correct documentation rules to clinical examples in order to identify the most complete and accurate diagnosis codes.

Medicare Wellness Visits

Documenting every condition, every year, is a critical part of value-based care. In this session, we'll detail the different types and requirements of Medicare Wellness Visits.
